

S.A.F.E. Building Action Program

Keeping your occupants and assets **S.A.F.E.**
is our top priority.

Sanitized. Area. Facility. Envelope.

As the COVID-19 crisis continues to test the commercial real estate industry's limits, you will need a community partner that can support you with facilities operation and maintenance expertise. Eco-Alpha has launched an effort to provide immediate support to those who operate and maintain buildings through our **S.A.F.E** Building Action Program.

What are you doing to **S.A.F.E** guard occupants and protect real estate assets during and after COVID-19?

Eco-Alpha's **S.A.F.E.** Building Action Program addresses this critical question to help minimize risk, increase workplace safety, and maintain asset protection.

What is the **S.A.F.E.** Building Action Program?

S.A.F.E. Sanitized. Area. Facility. Envelope.

In the **S.A.F.E.** Building Action Program, facility professionals follow an enhanced standard to operate and maintain a sanitized work environment to drastically reduce the health and safety risk to occupants within a building envelop.

Who needs **S.A.F.E.**?

"We're not just taking care of buildings, we're taking care of people"
- Uzoma Okoro, Eco-Alpha's President of Engineering

The COVID-19 crisis has garnered the need for a new standard in hygienic and occupant safety for the commercial real estate industry.

S.A.F.E. buildings define that standard, and offer comfort and security to the essential and returning workforce.

S.A.F.E. Building Action Program helps to protect all occupants within a buildings' envelope, establishes a new standard for asset protection, while lowering the risk of liability.

What's included in a **S.A.F.E.** Building Action Program?

A customizable program for your **S.A.F.E.** building(s) includes:

- 1-2 hr. building walkthrough
- S.A.F.E.** Building Scorecard Assessment
- A customizable **S.A.F.E.** Building Action Program that may include the following:
 - **Thermal Imaging at building entry point(s)**
 - Fever indication for building access protocols
 - ISO 13154 compliant thermal cameras
 - ISO 80601 clinical grade thermometers
 - **Enhanced air quality filtration (medical grade MERV 14 air filters)**
 - Blocks germs and harmful particulates
 - Increases indoor air quality
 - **100% outside air pulses**
 - Removal of recycled air
 - Reduce airborne pathogens & CO₂ levels
 - **Enhanced sterilization of common area surfaces**
 - Reduce pathogens in high traffic spaces
 - Reduce virus/bacteria transmission
